

T/Mon DTMF / Voice Interface

Simplicity and convenience: Ack or tag alarms from a touch-tone telephone with the T/Mon DTMF / Voice Interface

What Can the T/Mon DTMF / Voice Interface Do For You?

- Receive alarm notification via alpha or numeric pager
- Ack or tag alarms from any touch-tone telephone
- Visual alarm notification with communication status LEDs
- No-fuss integration with your existing T/Mon NOC alarm management system
- No extra databasing is required
- Ack or tag a single or all standing alarms from your remote site
- Free lifetime firmware upgrades
- Two year warranty
- Backed by DPS Telecom's top-rated 24/7 Tech Support.
- 30-DAY NO-RISK MONEY-BACK GUARANTEE

How the T/Mon DTMF / Voice Interface Works For You

Monitor your critical equipment around the clock with the T/Mon DTMF / Voice Interface — no matter how distant, isolated, or hard to reach your equipment might be. The T/Mon DTMF / Voice Interface reports alarms from your T/Mon NOC Remote Alarm Monitoring System directly to your numeric or alpha pager, so you'll have constant visibility of your remote sites.

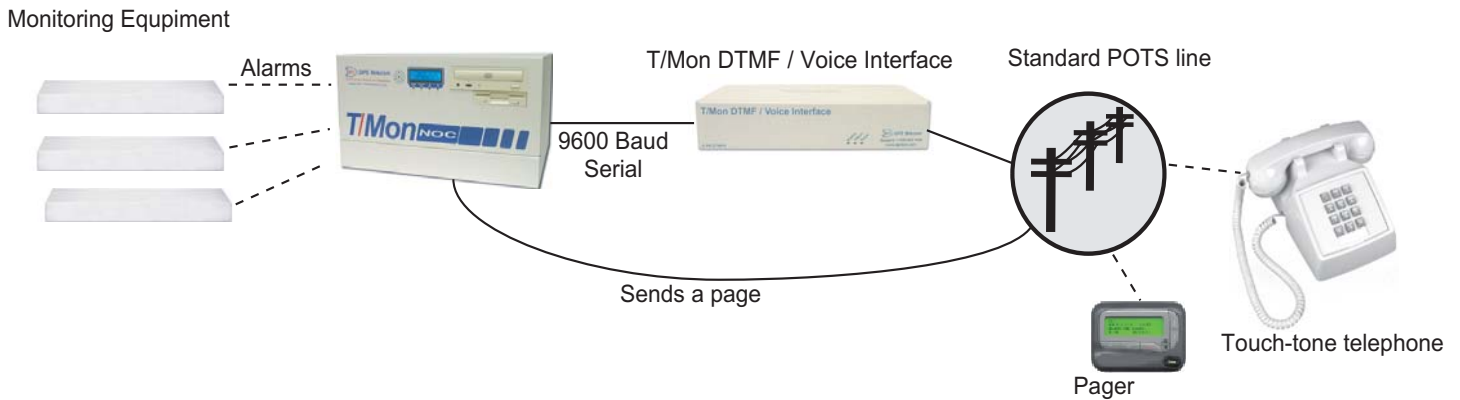

The T/Mon DTMF / Voice Interface allows you to control your T/Mon NOC Remote Alarm Monitoring System directly from any touch-tone phone. All it takes is a simple call to dial the T/Mon DTMF / Voice Interface, which is connected to a standard POTS line and you can acknowledge COS events or tag standing alarm item numbers you receive in your page.

The T/Mon DTMF / Voice Interface's compact design makes it easy to install in either 19" or 23" equipment racks, while saving valuable rack space for other revenue-making equipment.

The DTMF On-Call Software Module* provides easy plug-and-play integration with the T/Mon DTMF / Voice Interface and T/Mon NOC — no extra databasing required.

The T/Mon DTMF / Voice Interface is the solution that is guaranteed to work for you. All DPS Telecom products are custom built to order and backed by our 30-day no risk money back guarantee.

* DTMF On-Call Software Module is sold separately. T/Mon DTMF / Voice Interface with DTMF On-Call Software Module is available as a separate package — see ordering options.

Immediate and simple : *Ack one or all standing alarms using the item number from your pager alarm notification*

Ack or Tag a Single or All Alarms via Telephone

Alarm events processed by T/Mon are reported to you via pager. The page contains an eight digit item number, identifying the alarm event. Using a touch-tone phone to dial the T/Mon DTMF / Voice Interface, you can acknowledge one or all COS alarms , or you can tag a troublesome alarm for that site with the item number you receive in your page.

You can also define T/Mon to send alarm notifications to multiple pagers. And with T/Mon's alarm escalation feature you can define T/Mon to dial other pagers if an alarm has not been ack or tagged. So you can rest assure that no alarm will go unacknowledged.

Specifications

Dimensions:	1¾"H x 8"W x 6"D (4.45 cm x 20.32 cm x 15.24 cm)
Mounting:	19" or 23" rack
Power Input:	-48VDC (-40 to -70 VDC)
Current Draw:	Max: 39 mA Nominal: 33 mA
Fuse:	½ amp GMT
Interfaces:	T/Mon — RS-232 Telco — POTS
Visual Interface:	6 LEDs
Operating Temperature:	32°-140° F (0°-60° C)
Operating Humidity:	0%-95% noncondensing
