

NetGuardian Hinged Back Planes

Adding Convenience To Your Racks

Hinged Pluggable Back Plane: This version of our hinged back panel makes wiring your discrete alarms easier than ever before. Only a screw driver is needed eliminating the need for a wire gun saving you time and money.

Hinged Wire Wrap Back Plane: The hinged back panel design allows for easy access to the NetGuardian ports while cutting down on needless clutter in your racks.

Hinged Back Plane Benefits

- Hinged design saves space while still allowing easy access to the back ports
- No wire gun required making for an easy installation
- No more wiring to a 66 block
- Available in 19" and 23" rack sizes
- 2-year hardware warranty
- No risk, money back guarantee

Hinged Back Plane Overview

The Optional Hinged Wire Wrap (WW) back plane for the NetGuardian has two wire-wrap fields that allow easy termination access to the discrete alarms and relays outputs. This is attached behind the NetGuardian unit and saves you valuable space. Also, since it is a hinged design there is still easy access to the ports.

The Optional Hinged Pluggable back plane for the NetGuardian features an easy to use screw-lug interface. Not only does it allow for easy interfacing similar to the Wire Wrap option but it cuts down on man hours when wiring discrete alarms. Only a screw driver is needed for installation eliminating the need for a wire gun. It also features the famous hinged design that still allows easy access to the NetGuardian ports.
