# Line Protector 48
## D-PK-LNPRO-12004

The Line Protector 48 accepts up to 24 pairs of wires on its front panel.

All wiring on the front panel exits electrically protected from the back panel.

## Overview

If you have remote sites on mountaintops or other lightning-prone locations, you know how expensive the damage can be.

Any time that copper leaves your building, you're potentially vulnerable. This includes copper routed through unprotected equipment.

This simple device adds protection for up to 24 pairs.

### Benefits of the Line Protector 48

- SELF-RESETTING SURGE PROTECTION FOR **48** LINES.

- RACK-MOUNTED FOR CLEAN INSTALLATION.

- POWDER-COATED FOR DURABILITY.

- VERY EASY TO INSTALL AND USE WITH SPRING-CLAMP TERMINATION (NO TOOLS REQUIRED) AND NO SOFTWARE OR FIRMWARE TO CONFIGURE.

## Features

| D-PK-LNPRO-12004 Specs | |
|---|---|
| Power Requirements | Unpowered Device |
| Installation Type | Wiring Only |
| Operating Temp | -20° to 70°C |
| Storage Temp | -40° to 85°C |
| Max Surge (I=) | 10KA @ 8/20 uSec |
| Let Through (V=) | 90v @ 100v/sec (DC), 300v @ 100v/uSec (impulse) |
| Frequency Response | 1MHZ LPF |
| Case Type | Aluminum Powder-coated |
| Orientation | Connectors on front and back panels |
| Wire Termination | Spring-clamp |
| Wire Gauge Range | 14-28 AWG |
| Mounting Style | Rack mount |
| MTBF | 15 Years |
