

# NetGuardian 480 G4 Hinged Back Panel (2RU)

D-PK-NGPAN-12053.00001

### Overview:

The Hinged Pluggable Back Panel for NetGuardian 480 G4 attaches behind a NetGuardian 480 G4 for easy alarm termination. The back panel features pluggable barriers that allow convenient termination access to the discrete alarms and controls. This is ideal for uses where rack space is at a premium. The back panel hinges open for easy access to the data (serial) port, LAN, and power connections of the NetGuardian. The panel mounts to the rear side of a relay rack.

### Benefits:

- Easily connect alarms and controls.
- Hinged for access to ports on the back of your NetGuardian.
- Designed to conserve rack space.
- Easy installation.
- No power to the panel necessary

### Specifications:

**Recommended wire gauge range:** 14-30AWG

#### Connector Types:

- 36 4-pin ports (connectors included)
- 4 50-pin amphenol ports

**Dimensions:** 3.488" H x 17.125" L x .698" W

### Included Accessories:

Comes with all connectors and cables necessary to connect to your NetGuardian.

Includes 36 4-pin screw down connectors for easy termination
