

NetGuardian G2-G5 Hinged Back Panel

19 inch rack - D-PK-NGPAN-12021.00001

23 inch rack - D-PK-NGPAN-12007.00001

Overview:

The Hinged Pluggable Back Panel for NetGuardian 832 G2-G5 attaches behind a NetGuardian 832 G2,G3,G4 or G5 for easy alarm termination. The back panel features pluggable barriers that allow convenient termination access to the Discrete alarms, Controls and Analog inputs. This is ideal for uses where rack space is at a premium. The back panel hinges open for easy access to the data (serial) ports, LAN, phone and power connections of the NetGuardian. The panel mounts to the rear side of a relay rack.

Benefits:

- Easily connect alarms, controls, and analogs.
- Hinged for access to ports on the back of your NetGuardian.
- Designed to conserve rack space.
- Universal design made to fit 4 generations of NetGuardian 832As.
- Easy installation.
- No power to the panel necessary

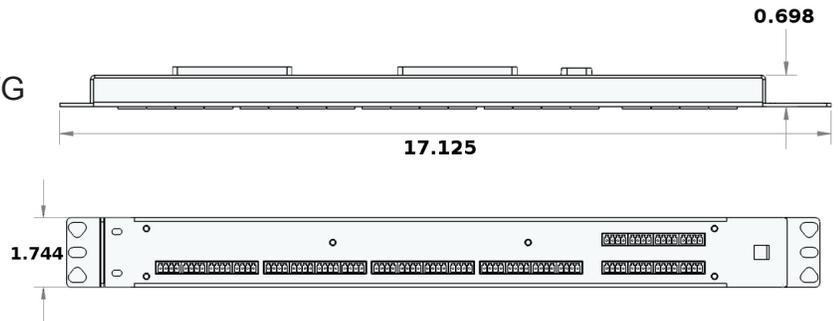

Specifications:

Recommended wire gauge range: 14-30AWG

Connector Types:
