The UPS Expansion keeps your RTU running during power failures - even for days at a time

Benefits of the UPS Expansion

- **60 hours of runtime**
- **6-8 hour charge time at -48V**
- **Low power indicator**
- **Works with +12VDC devices**
- **Occupies 1 RU shelf**
- **Compatible with any DPS RTUs**
- **Can be used in conjunction with a wireless modem**
- **48VDC input**
- **(Optional) Dual Power**

Overview

Your remote monitoring system must have adequate battery backup. You might be thinking, "But I have battery plants at my remote sites." But, whether that's true or not, you really need to have a dedicated UPS battery just for your alarm remote to make sure that it can continue running no matter what happens to the power at your site. What is needed is a simple, 1 RU shelf that would contain batteries which can power any DPS RTU.

That's exactly what's been created. The UPS Expansion is an RTU accessory that you can use with any DPS RTU. Whether you need the full-featured NetGuardian 832A or something smaller like the NetGuardian 216 G3, your options are wide open.

No matter which RTU you decide to use, you'll get plenty of run-time from the UPS batteries. Testing with a NetGuardian 216 G3 and a wireless modem yielded over 2 days of battery life. Now, regardless of the RTU you need, you know that it will remain powered when you need it most. When you combine a UPS with a wireless modem, then you've got a truly independent remote monitoring solution.

Specifications

Power Input Options:	Dual Feed -48 VDC (-36 to -72VDC)	Weight	10.2 lbs
Max. Current:	750 mA	Visual Interface:	2 front panel LEDs 5 back panel LEDs
Fuse:	3/4A GMT	Operating Temp:	32° to 140° F (0° to 60° C)
Dimensions:	1.75" H x 17" W x 7.5" D	Operating Humidity:	0% -95% non-condensing
Mounting:	19" or 23" rack	RoHS:	5 of 6
